OBJECTIVE

MCA student with hands-on experience in Python, SQL, MS Excel, Tableau and Power BI, seeking a Data Analytics/Data Science internship where I can clean and analyze large datasets, build dashboards and predictive models, and support data-driven decision-making for stakeholders.

EDUCATION

Master of Computer Applications (MCA) MS Ramaiah University of Applied Science, Bengaluru CGPA (Semester 1): 8.55	2025 – Present
Bachelor of Computer Applications (BCA) N.C. Autonomous College, Jajpur, Odisha CGPA: 7.96	2022 – 2025

TECHNICAL SKILLS

- **Data Analytics & Data Science:** Python, SQL, Exploratory Data Analysis, Data Cleaning, Predictive Modeling, Machine Learning basics
- **Visualization & BI Tools:** Tableau, Power BI, MS Excel
- **Programming Languages:** Python, Java, C
- **Web Technologies:** HTML, CSS, JavaScript
- **Databases:** SQL, MySQL
- **Tools & Platforms:** Git, GitHub
- **Core Concepts:** Data Structures & Algorithms
- **Soft Skills:** Communication, Critical Thinking, Problem Solving, Teamwork, Adaptability

PROJECTS

Zomato Restaurant Data Analysis

- Utilized Python and SQL to clean, manipulate, and analyze a large-scale restaurant dataset, handling missing values, duplicates, and inconsistent formats.
- Performed exploratory data analysis (EDA) to uncover trends and patterns in customer ratings, cuisines, online ordering, and table booking preferences.
- Developed interactive data visualizations and dashboards in Tableau and Power BI to present restaurant distribution, rating patterns, and cost variations to stakeholders.
- Derived actionable insights on factors influencing ratings and customer preferences, enabling data-driven business recommendations.

AyurSutra: Panchakarma Patient Management Software

- Developing a specialized management solution to automate therapy scheduling and documentation for Ayurvedic centers.
- Designing an automated notification system to alert patients regarding critical pre- and post-procedure precautions via customizable channels.
- Implementing real-time therapy tracking and visualization tools (graphs/progress bars) to monitor patient recovery milestones and feedback.
- Integrating a feedback loop for patients to report symptoms, enabling practitioners to refine treatment schedules dynamically.
